	TOCOPHEROL	TOCOPHEROL	-	0.10
				100

Operating instructions

- Heat phase A at 85°C, mix slowly and control that everything is melted and homogeneous.
- Add the powder of phase B and disperse with Ultra Turrax (2000rpm) for 5 minutes.
- Prepare the premix C, by wetting the pigment, and grind with a 3 roll mill. Control that the dispersion is homogeneous.
- Add premix C into A+B (85°C) and disperse with Ultra Turrax (2000rpm) for 5 minutes.
- Prepare the premix D at 65°C. It will form a homogenous paste.
- Add premix D (65°C) into A+B+C (85°C) and disperse with Ultra Turrax (2000rpm) for 5 minutes.
- Add phase E into A+B+C+D at 85°C. Mix slowly.
- Pour at 82°C ±2°C in a lipstick mold previously heated at 40°C. No need to use silicone spray into the mold.
- Let cool down 30 minutes at room temperature and then freeze for 20 minutes.

Hydraboost Tinted Lip Balm

2860-1.19

+ Skincare x Make-up

+ Oil-in-stick sensation

+ Light coverage

Description

The texture of this lip balm is addictive! It glides easily on lips, leaving a comfortable moisturizing film with a light pink shade. This formula is vegan compliant. Thanks to **Acticire® MB**, Hydraboost Tinted Lip Balm is enriched with an aqueous active ingredient: **Gatuline® Expression**, that redesigns lip contour. Why choosing between skincare and makeup?

Specifications

- + Aspect: Pink lipstick
- + Rupture test: 500 g/F
- + Drop point: 76°C
- + Natural origin > 99% (ISO 16128)

Ingredients

- **Emulium® Illustro** is a natural origin W/O emulsifier and wetting agent, used here for another function: it helps to unmold the stick without using silicone spray.
- Phyto wax 2225, Candellila wax and Kahlwax 6607L are waxes used to give the structure to the stick. Their combination helps to create a solid structure but that has creaminess and gliding onto the lips.
- **Lipocire™ A SG** is a feeling agent that brings a melting sensation thanks to its melting point close to body temperature. It also improves color homogeneity and enhances glossiness in lipsticks.
- **Gatuline® Expression** smoothes and redesigns lip contour.
- SERICA 5 is a feeling agent bringing an illuminating effect.
- **Acticire® MB** brings moisturization, comfort, and permits to incorporate 2% of water phase in anhydrous lipstick formulas when used at 5%.
- KahlJelly 7038 Coco is a blend based on coconut oil that provides a silky balmy sensation onto the lips.
- Perfume Infusion d'Hamamelis Natflor MKT1131 is a biodegradable and natural origin perfume.
