Gatuline® Expression AF

Immediate smoothing

Actives

Facial movements and expression lines

Smiling, squinting, pursing the lips... expression lines are the results of thousands of daily involuntary micro-contractions of the facial muscles.
These lines become more visible and deeper as we age, and represent a true concern for people who want to maintain a youthful appearance.

Our facial expressions leave their imprint on our skin and lead to the formation of expression lines:

- Fine lines start being visible around the age of 30 and will turn into deep wrinkles over the years.
- Affected areas include outer eye corner (where crow's feet will appear), forehead, lip contour, nasolabial folds and neck.

Limiting the contractions of the facial muscles, with a safe alternative to injections, can delay and limit the onset of these first signs of skin aging.

A safe plant-based alternative to plastic surgery and other invasive techniques, Gatuline® Expression AF efficiently fights against expression lines.

Lips play a key role in attraction and expression of emotions. Full heart shaped lips with well defined borders and upturned corners are an unfailing symbol of sensuality and feminine charm.

As we age, our lips lose their shape and definition: they become thinner, the double upper curve known as Cupid's bow flattens and the lip borders become less visible. Vertical upper lip lines, otherwise called barcode wrinkles, appear. From each corner, wrinkles known as bitterness folds fall upon the lower cheek, giving the face an impression of severity.

Gatuline® Expression AF is the first active capable of redesigning completely the mouth contour, restoring its definition, recurving the Cupid's bow and lifting vertical wrinkles.

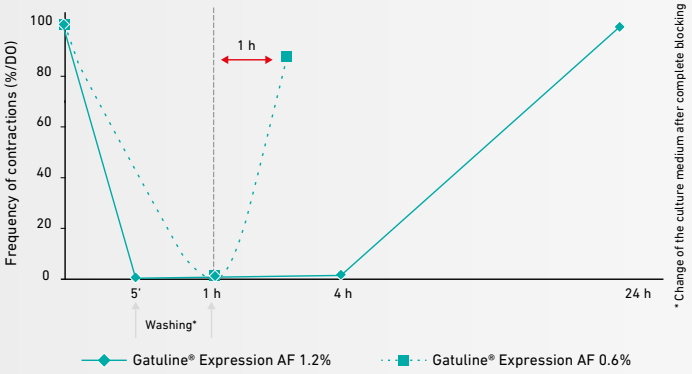

Gatuline® Expression AF acts on all facial expression lines and wrinkles with a confirmed efficacy on both eye and lip contours.

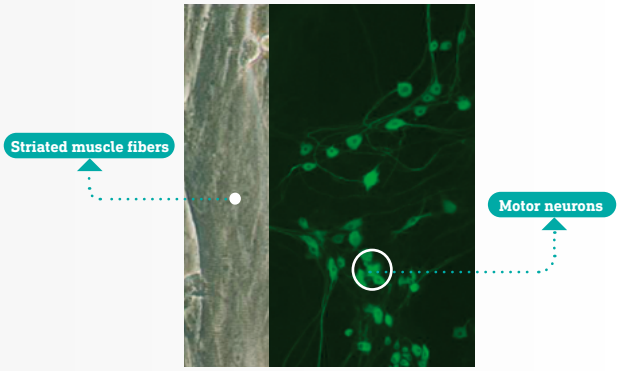

Immediate myorelaxing and smoothing effect

From just 0.6%, Gatuline® Expression AF offers complete myorelaxation with a fully reversible action. The ingredient significantly smooths expression lines, unlike placebo, and rapidly improves skin texture by reducing skin roughness from the first day of use.

Powerful and reversible action on muscle fibers

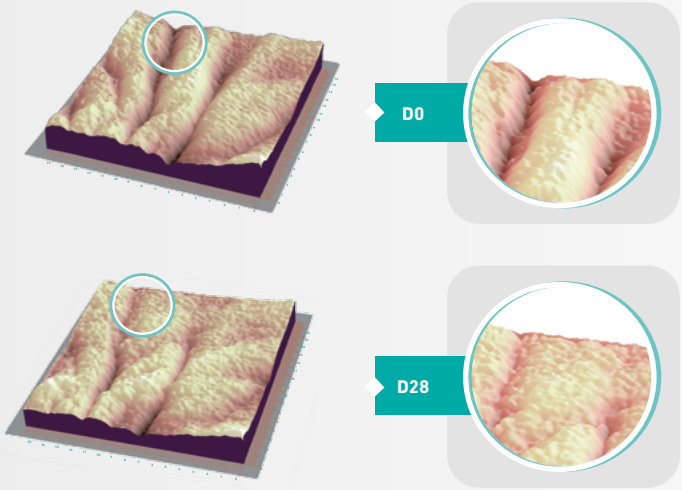

The myorelaxant activity of Gatuline® Expression AF was first tested in a model reproducing muscle contractions (nerve muscle co-culture). The muscle contraction frequency was measured after incubation with Gatuline® Expression AF at 0.6% and 1.2%.

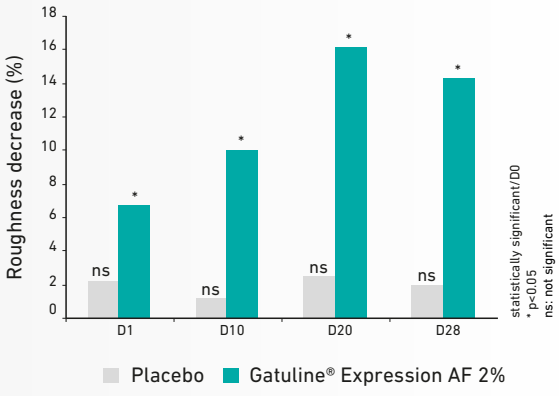

Visible smoothing effect on fine lines

The efficacy of an emulsion containing 2% Gatuline® Expression AF was assessed *versus* placebo, using the fringe projection method on the crow's feet area [1].

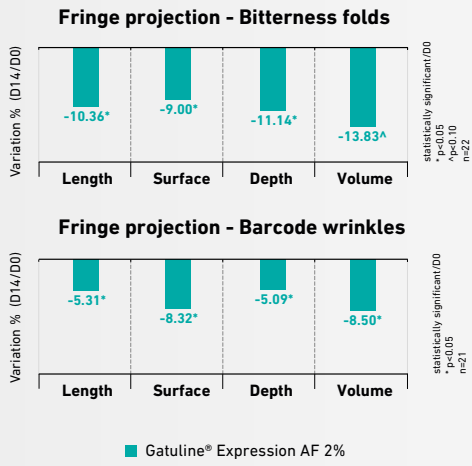

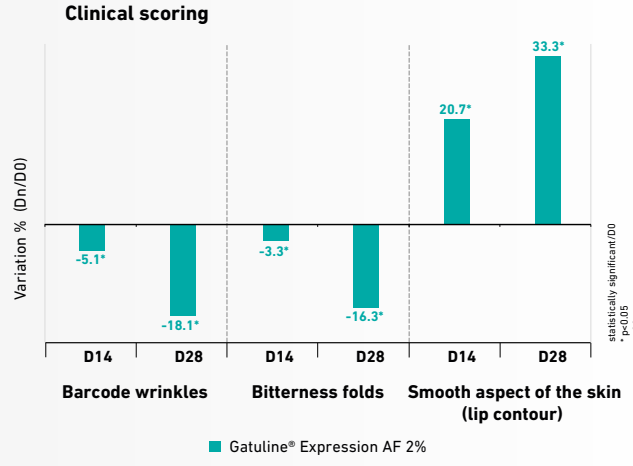

[1] 28-day clinical evaluation, involving twice daily application to split face in a simple blind study under dermatological control.
Panel of Caucasian or Latin Mediterranean women, aged 38 to 50 with wrinkles of medium to strong intensity on both crow's feet.

Lip contour rejuvenation

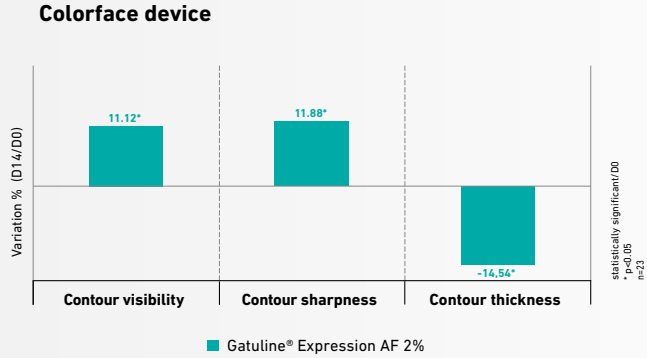

From day 14, Gatuline® Expression AF visibly diminishes barcode wrinkles and bitterness folds, offering a safe alternative to injectable procedures. Its skin-smoothing action improves lip contour definition and sharpness, helping restore a more harmonious, feminine mouth shape and a naturally radiant smile.

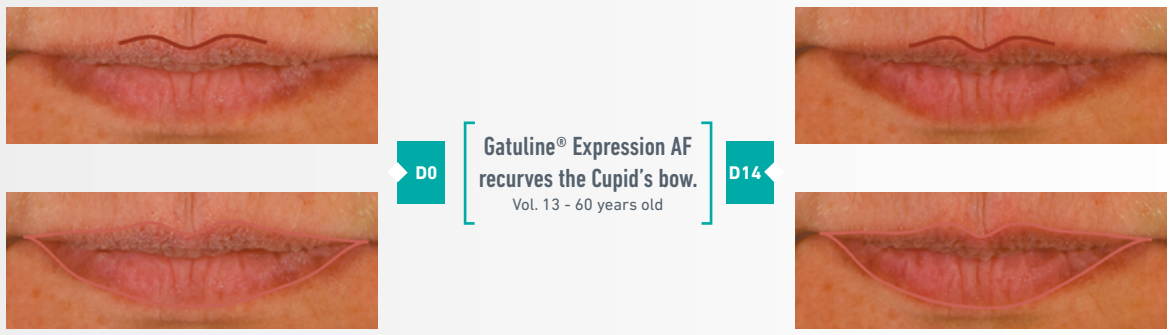

Clear reduction of vertical wrinkles

Redefinition of lip contour

[2]28-day clinical evaluation, involving twice daily application of an emulsion containing 2% Gatuline® Expression AF. Panel of 30 urban women (47% smokers), aged 47 to 65, with all skin types.

Gatuline® Expression AF

efficiently fights against the appearance of expression lines and visibly smoothes the skin's surface. Eye and lip contours are quickly and efficiently redesigned.

Sourced in Madagascar, *Acmella oleracea*, also called "Mafane", is a small yellow flower traditionally used as a spice and medicinal plant, and that shows natural anesthetic properties.

Spilanthol, an alkylamide, has been shown as being the molecule bringing the myorelaxant activity to Gatuline® Expression AF.

Claims

- Myorelaxant effect
- Instant visible results
- Natural alternative to injections
- Erases expression lines
- Reduces barcode wrinkles and bitterness folds
- Smoothes and redesigns the lip contour
- Recurves Cupid's bow

Applications

- Anti-aging products
- Anti-wrinkle care
- Eye and lip contour treatments

INCI

Propanediol (and) Water (and) Acmella Oleracea Extract

Other grade available: Gatuline® Expression
Alcohol (and) Water (and) Acmella Oleracea Extract

2-5%

Approved by ECOCERT RAW MATERIAL
COSMOS APPROVED

PRESERVATIVE FREE

NATURAL STATUS 100% ISO 16128
