Redefining Body Butter

2371-1.22

- + Thick texture
- + Bouncy effect
- + Anti-gravity action

Description

The face is not the only area to show signs of aging. This body butter is therefore an ally for all skins marked by gravity.

Its bouncy texture, created with Emulium® Dolcea MB, penetrates quickly, leaves a very soft and comfortable afterfeel without any greasy sensation. Thanks to EleVastin™, body contours are redefined and the skin is smoothed day after day.

Ingredients

- **Emulium® Dolcea MB** is a robust O/W emulsifier of 100% natural origin that provides an extreme softness to the cream and brings immediate and long-term moisturization to the skin.
- Lexfeel WOW-A-DT is an emollient that brings a silicone-like feel to the emulsion.
- Makigreen GF is an oil gelling agent that creates a bouncy texture.
- Natrosol Plus 330 CS and Xanthan Gum are gelling agents that help to stabilize the emulsion.
- **EleVastin™** is a clinically proven active ingredient especially designed for mature skin that acts as an anti-gravity agent, since it redefines facial contours and reduces deep and vertical wrinkles day after day.
