				100.00

Operating instructions

- Heat water of A1 to 75°C and disperse Avicel PC 591 under high shear (2000-2500 rpm) for 15 min.
- Prepare premix A2 and add to A1. Mix for 5 min.
- Prepare B and heat to 75°C.
- Add B to A (75°C) under high shear (rotor stator 2500) for 10 min.
- Cool under moderate shear until 50°C then add C.
- Increase agitation for 5 min then cool under moderate shear until 35°C.
- Add D.
- Adjust pH with E.

Restoring Cream-to-oil

2372-2.06

+ Transforming texture

+ Long playtime

+ Soft afterfeel

Description

This transforming product will surprise you! Its creamy texture turns into oil when applied on the skin. Formulated with Emulium® Dolcecia MB, it contains a very high amount of oil phase. Its long playtime makes it possible to enjoy its restoring properties brought by Gatuline® RC Bio and Gatuline® Skin-Repair AF.

Specifications

+ Aspect:
White emulsion

+ pH = 5.7 ± 0.5

+ Viscosity Brookfield RV (spindle A, speed 5):
approx. 17 000 mPa.s after 24h

Ingredients

- Avicel PC 591 and Xanthan gum are natural aqueous gelling agents.
- Glycerin is a moisturizing agent.
- **Emulium® Dolcecia MB** at 5% makes it possible to incorporate 45% of oil phase, for a transforming, slippery and soft emulsion without any oily sensation after absorption.
- Heptyl Undecylenate and Cetiol Ultimate are emollients which improve spreadability and bring a dry touch.
- **Gatuline® RC Bio** is a clinically tested active ingredient which reinforces epidermal architecture and increases skin moisture.
- **Gatuline® Skin-Repair AF** is a clinically tested active ingredient which stimulates optimal reconstruction of dry or damaged skin, promotes natural regeneration for fresher, smoother, more radiant skin and restores skin barrier for enhanced moisturization and protection.
