Operating instructions

- Heat A to 85°C until complete homogenization.
- Let the temperature go down to 70°C.
- Add B, C and D under moderate mixing for 5 min.
- Pour at 55°C into a stick mould.

Softer Skin Stick 2613-1.17

- + Practical stick format
- + Exfoliating
- + Non-drying

Description

This stick is very practical to gently exfoliate the skin. It deposits the right amount of product on the skin and is easy to rinse off thanks to its texture that emulsifies on contact with water. It leaves the skin soft and comfortable without drying it out.

Specifications

+ Aspect:
Beige stick with brown grains

+ 99% natural origin (ISO 16128)

Ingredients

- **Emulium® Dolce MB** is used at 5% to emulsify a high amount of waxes.
- **Acticire MB®** and Kahlwax 6607H are amphiphilic waxes that facilitate rinsing. **Acticire® MB** also brings moisturization and confort.
- **MOD MB** and Isoetaryl Isostearate are emollients that improve spreadability and confort without greasy sensation.
- Corn PO4 PH B 9042 is a powder that reduces greasiness and improves softness during application.
- Amihope® LL is a feeling agent that improves viscosity without greasy effect.
- **Original Extract™ Grape Bio** is an organic fruit water.
- Glycerin is a well-know moisturizing agent.
- Saponin + and Jordapon® SCI Powder are surfactants that faciliate rinsing.
- Apricot Bioexfoliator 200 is an apricot kernel powder whose granulometry is adapted to facial skin exfoliation.
