Operating instructions

- Wet Kelco-care™ into Glycerin of phase A2, add it to phase A1, stir gently and heat to 70°C.
- In a separate beaker, prepare ingredients of phase B and heat it to 70°C.
- Add phase B to phase A while homogenizing.
- Cool down to 35°C under moderate stirring.
- Add ingredients of phase C, D and E under gentle stirring.

Description

Experience the unexpected... This slime-like green translucent gel cream isn't what you think it is at first sight! Once applied, this cream is really soft & pleasant. Emulium® Dolcea MB in combination with glycerin creates this stringy texture that you can use as a body massage gel cream thanks to its long playtime. On top, Gatuline® Skin Repair AF protects your skin from dehydration by restoring your skin barrier function.

Specifications

+ Aspect: Green translucent gel cream

+ pH = 7,5 ± 0.5

+ Viscosity Brookfield RV (spindle B, speed 5): approx. 35 000 mPa.s after 24h

+ 98,2% natural origin (ISO 16128)

Ingredients

- **Emulium® Dolcea MB**, used at 3%, creates a stable texture with high oil load and emulsifies when in contact with water.
- Cetearyl alcohol brings thickness.
- Kelco-care™ is a gelling agent used in a very low amount that stabilizes and creates a fluid texture.
- Glycerin at a very high amount gives a translucent aspect and a fluid texture. Both Kelco-care™ and glycerin create a stringy texture.
- **Acticire® MB** brings comfort and moisturization.
- A mix of emollients (Lexfeel Natural, **Labrafac® CC MB**, Cetiol® Ultimate) with different feel make a creamy emulsion when diluted with water.
- **Gatuline® skin repair AF** is clinically proven to restore the skin barrier function.
- **Original Extract® Lotus** has soothing properties (*in vitro*).
