Operating instructions

- Heat A to 85°C for 15 min.
- Cool A under moderate mixing until 50°C.
- Heat B1 to 50°C and mix until homogenization.
- Add B2 into B1 under mixing.
- Under rapid mixing (rotor stator 3 000 rpm), add B to A at 50°C for 10 min.
- Cool by steps under rapid mixing (2 500 rpm).
- At about 35°C, add C.
- Complete cooling under rapid mixing.

Description

This anhydrous multifunctional balm takes care of the skin of the face, the body, the hands and also the lips and the hair. It contains Acticire® MB which allows the incorporation of aqueous ingredients such as active ingredients or colorants, for more customization!

Specifications

+ Aspect:
Thick green balm

+ 99% natural origin (ISO 16128)

Ingredients

- The association of **Compritol® 888 CG MB** (consistency agent), **Geleol™ MB** (co-emulsifier) and Kahlwax 2442L (vegetable wax) creates a thick and supple texture that crystallizes in a homogeneous and reproducible way during cooling.
- **Labrafac™ CC MB, MOD MB**, Cetiol® C5 and Jojoba Oil were chosen according their sensoriality, to obtain a perfect balance with emollient properties yet no greasy feeling.
- **Acticire MB®** is an amphiphilic texturing ingredient that brings moisturization and comfort and enables to incorporate aqueous ingredients in anhydrous formula.
- **Gatuline Skin-Repair AF** is a clinically tested active ingredient that reduces inflammation, restores skin barrier function and preserves the skin from dehydration.
