Operating instructions

- Heat A to 85°C, maintain at 85°C for 10 min.
- Heat B to 75°C under mixing.
- Add A to B and mix with a defloculent at 300 rpm for about 3 min.
- Heat C to 50°C and add to A+B under mixing.
- At 70°C, add D and mix with a defloculent at 400 rpm for about 4 min.
- At 65°C, add E and mix at 400 rpm for about 5 min.
- At 45°C, add F and mix at 500 rpm.
- At 38°C, increase speed mixing at about 600 rpm.
- At 35°C, pour the product in a jar.

Scalp & Body Scrub

2628-1.07

+ Multi-fonctionnal

+ Exfoliating

+ Easy rinsing

Description

Exfoliating the scalp has become trendy! For this, there is nothing like this anhydrous wax with grains of sodium bicarbonate that gently exfoliates, then rinses easily without residue in the hair. It can also be used on the body for a 2-in-1 application.

Specifications

+ Aspect:
Off-white wax with grains

+ 94% natural origin (ISO 16128)

Ingredients

- Kahlwax 6607L and stearic acid are consistency agents that bring thickness.
- **Labrafac™ CC MB** is an emollient that improves spreadability and brings a soft feel without any greasy sensation.
- Nomcort HKG is an oil gelling agent that improves stability.
- **Acticire® MB** is a texturizing agent that brings confort and moisturization and boosts foam formation.
- **Emulium® Kappa MB**, used at 4%, enables product emulsification upon contact with water, which facilitates rinsing.
- **Lipocire® A SG** is a texturizing agent that improves product pick-up and brings a melting sensation during application thanks to its melting point close to body temperature.
- Hydramol TGL is a foam booster.
- Natrosol Plus 330 CS is an aqueous gelling agent in the form of a powder that swells in contact with water and boost foam formation.
- Sodium bicarbonate is used as an exfoliating agent as grains will be dissolved by water, leaving no particles on the hair or skin after rinsing.
