				100,00

## Operating instructions

- Disperse Exilva of phase A at RT into water under high shear (Ultra turrax 10 000 rpm for 10 minutes).
- Prepare premix B by wetting Satiaxane with glycerin.
- Add phase B into phase A, using a defloculator (moderate shear) for 10 minutes / or Ultra Turrax for 5 min.
- Disperse phase C into phase A+B using ultra turrax for 10 minutes until homogenous.
- Add phase D under moderate mixing.
- Adjust pH with phase E.

## Squid Ink Topping

2748-2.04

+ Mix & play

+ Detoxifying

### Description

This aqueous charcoal gel blends perfectly with the **Cottage Cheese (2748-1.11)** formula. It creates a smooth and creamy detoxifying mask leaving your skin very soft, energized and protected with Original Extract® Ginger. It can also be used alone as an energizing shot leaving no visible black residue on the skin.

### Specifications

- + Aspect: fluid black gel
- + pH = 5,5 ± 0.5
- + Viscosity Brookfield RV (spindle A, speed 5): approx. 2440 mPa.s after 24h
- + 99,8% natural origin (ISO 16128)

### Ingredients

- Exilva FM 05-L and Satiaxane are gelling agents that suspend Charcoal.
- Glycerin is a humectant.
- **Original Extract® Ginger** has antioxidant & protecting properties (*in vitro*).
